Technical Experience

- Software Developer Intern** — Cortico Health, Vancouver Jan 2026 – Current
- Led the development of a fax feature integrating multiple third party fax providers streamlining providers workflows facilitating in over **2000 faxes sent per month**.
 - Managed team specific production escalations by systematically analyzing application logs and Sentry telemetry diagnosing errors and delivering robust hotfixes.
 - Wrote Playwright E2E and Vitest unit tests covering key feature scenarios, integrating them into Jenkins CI/CD pipelines to catch regressions and improve build stability.

Projects

- InsightsAI (StormHacks 2025 Hackathon)** — React, Supabase, Node.js October 2025
- Developed a full stack application in 24 hours leveraging **Node.js and Supabase** for the backend, demonstrating practical experience with database management and full stack development.
 - Implemented **dynamic chart rendering and data structuring from raw outputs**, strengthening skills in preparing data for visualization.
 - Collaborated on UI/UX design to ensure clear data interpretation and a user friendly interface for business users, **highlighting strong teamwork and communication skills**.

- NHL Game Predictor** — Python, Pandas, Seaborn, SciPy May 2025 - Aug 2025
- Executed end to end ETL and data transformation on 16 years of NHL data, performing grouping and aggregation to prepare data for **statistical analysis and prediction**.
 - Built and validated a Random Forest Classifier achieving **59% accuracy**, evaluating **model performance** across seasons to demonstrate strong **problem solving and analytical skills**.
 - Developed key **data visualizations** using Seaborn to highlight factors influencing game outcomes, strengthening analytical insight and presentation.

- Shape Up Fitness** — HTML, CSS, SpringBoot Jan 2024 - Apr 2024
- Utilized Spring Boot to implement backend logic following the Object Oriented MVM pattern, enabling efficient data tracking and structured application flow.
 - Coordinated with the client through multiple design and feedback iterations to **gather requirements**, emphasizing communication and planning for the project.
 - Delivered features on time by actively participating in **agile practices** and iterative development cycles, demonstrating organizational skills.

Technical Skills:

Languages: Python, Typescript, Java, Javascript, SQL

Technologies: React, Docker, Sentry, Jenkins, Django, Vitest, Playwright, Postgres, Pandas

Education

- Simon Fraser University** GPA: 3.1 Sept 2022 – Present
- Third Year in Bachelor of Science, Major in Computer Science
